Epic

Epic is a cloud-based EHR built for hospitals with the functionality to handle the day-to-day operations of a practice, including patient medical records. Many Brother products are equipped with a TWAIN compliant driver for scanning from applications like Epic.

MEDITECH

MEDITECH provides a comprehensive and integrated EHR system designed to help your organization increase patient safety, streamline processes, and improve patient safety and transitions of care. Many Brother products are equipped with a TWAIN compliant driver for scanning from applications like MEDITECH.

Advanced Document Capture Software

TUNGSTEN
AUTOMATION FORMERLY KOFAX

Tungsten VRS Elite™ / Tungsten Express™ are applications sold by Tungsten Automation, which offer advanced image processing. This software automatically analyzes scanned materials and applies the appropriate image correction settings for optimal scan results. The Brother ADS-4300N, ADS-4700W, and ADS-4900W professional desktop scanners offer compatibility with Tungsten VRS Elite™ / Tungsten Express™.
