FINANCIAL SERVICES SOLUTIONS FROM BROTHER

Dependable and Secure Printing, Scanning, and Labeling for Financial Services

Smart Print Management Designed for Financial Services

No matter where your business is on the road to digital transformation, paper documents continue to be part of the workflow. The challenge is in meeting strict security requirements, while also integrating paper and digital content and streamlining daily operations. Brother can help optimize your print environment with reliable, secure, and cost-effective document management technology and solutions for your financial services organization.

PROTECT CRITICAL DATA AND CUSTOMER INFORMATION

Securing sensitive client data and confidential information is a top priority for financial services organizations. Brother printers, all-in-ones, and scanners offer triple layer security features that can help ensure the security of sensitive documents, devices, and networks – and protect client information from internal and external security threats.

FACILITATE DIGITAL TRANSFORMATION

Brother provides products and solutions with cutting-edge mobile device and web-based features that make it easy to connect, print, and share important information virtually anytime, anywhere – quickly, easily, and securely. Enable seamless data capture of reports, records, contracts, files, and more. Transform paper-based materials to digital documents and enable online sharing via computers, mobile devices, or the cloud.

KOFAX

Leverage Kofax ControlSuite within select Brother printers and all-in-ones for best-in-class document capture, print management, and output management capabilities, as well as additional benefits in support of digital transformation initiatives.

REMOTE ENVIRONMENT

· Reports and presentations
· Client communications
· Financial data (budgets, forecasts, and planning)
· Label and organize files, folders, and more

Brother Can Help Your Financial Services Organization

Streamline Processes and Optimize Workflows

Print more efficiently so that you can focus your time on what really matters – cultivating your client base and growing your business. Having dependable technology is crucial to ensuring a seamless experience for your clients, while also streamlining your document management processes.

Manage a Mobile Workforce

Help enable remote work with smaller, cost-efficient devices that offer the same capabilities (e.g. mobile / cloud support, security) demanded in business environments. Print from and scan to virtually all the major mobile devices[1], operating systems and popular business cloud services[2], allowing for business continuity and collaboration among remote work environments.

Capture and Share Information

Brother offers the Barcode Utility value service, enabling documents that have a barcode or QR code to be scanned, saved, and filed using structured workflows and document routing technology. Save time, improve security, and reduce errors in job separation, file renaming, or folder and destination filing.

Control Costs

Right size your print and capture environment to meet your organization's workflow, budget, and facilities requirements. Leverage Kofax ControlSuite on select Brother devices to help manage, account for, and charge back print, copy, fax, and scan output to specific clients.

Mobile Printing and Labeling Solutions for Financial Services

Brother mobile printing and labeling solutions enable you to easily print barcode document labels when needed and accurately identify documents, charts, files, and more. Brother QL label printers produce cost-effective, professional labels for visitor management, general mailing, and more. Brother P-touch label makers are ideal for areas where quick identification of binders, folders, and storage bins save valuable time.

1 Requires connection to a wireless network.
2 Requires an Internet connection and an account with desired service.
